WHO WE ARE

Combo is a cooperative company founded in 2016 in Bologna by Miguel Gatti. It actively works in film production and provides technical services to small and large productions, both local and national, as well as international.

Over time, the company has become a reference point for young directors, enabling them to develop their professional careers.

Over the past 10 years, the experiences of its associated company Garaje Produzioni combined with Combo have produced around twenty electricians, grips, directors, and cinematographers who work in the industry throughout Italy.
