

The Studio

We are H7-25 Studio and we help Brands to become iconic.

The studio was founded in 2019 from the restructuring of a previous facility, but it's consisting of professionals with more than 20 years of experience in working at the higher levels of the production and post-production industry.

The studio is focused on design and production of branded contents, commercials, VFX shots, both full CGI or mixed media CGI/Live Action, at the higher international standards.

H7-25 is based in Parma with a huge net of partners and contributors, spreading from Verona, Roma, Torino, to Melbourne, Vancouver and Sidney.

We are highly skilled in photorealistic CGI, Fluid simulations, CGI Food, CGI Creatures and 3d for Automotive and Luxury .

The department we are most known for is Brand Mascots design, where we can claim a lot of successful case histories.

Our mission is to assist clients and agencies in deeply catch audience's eyes and memory.

Design for entertainment

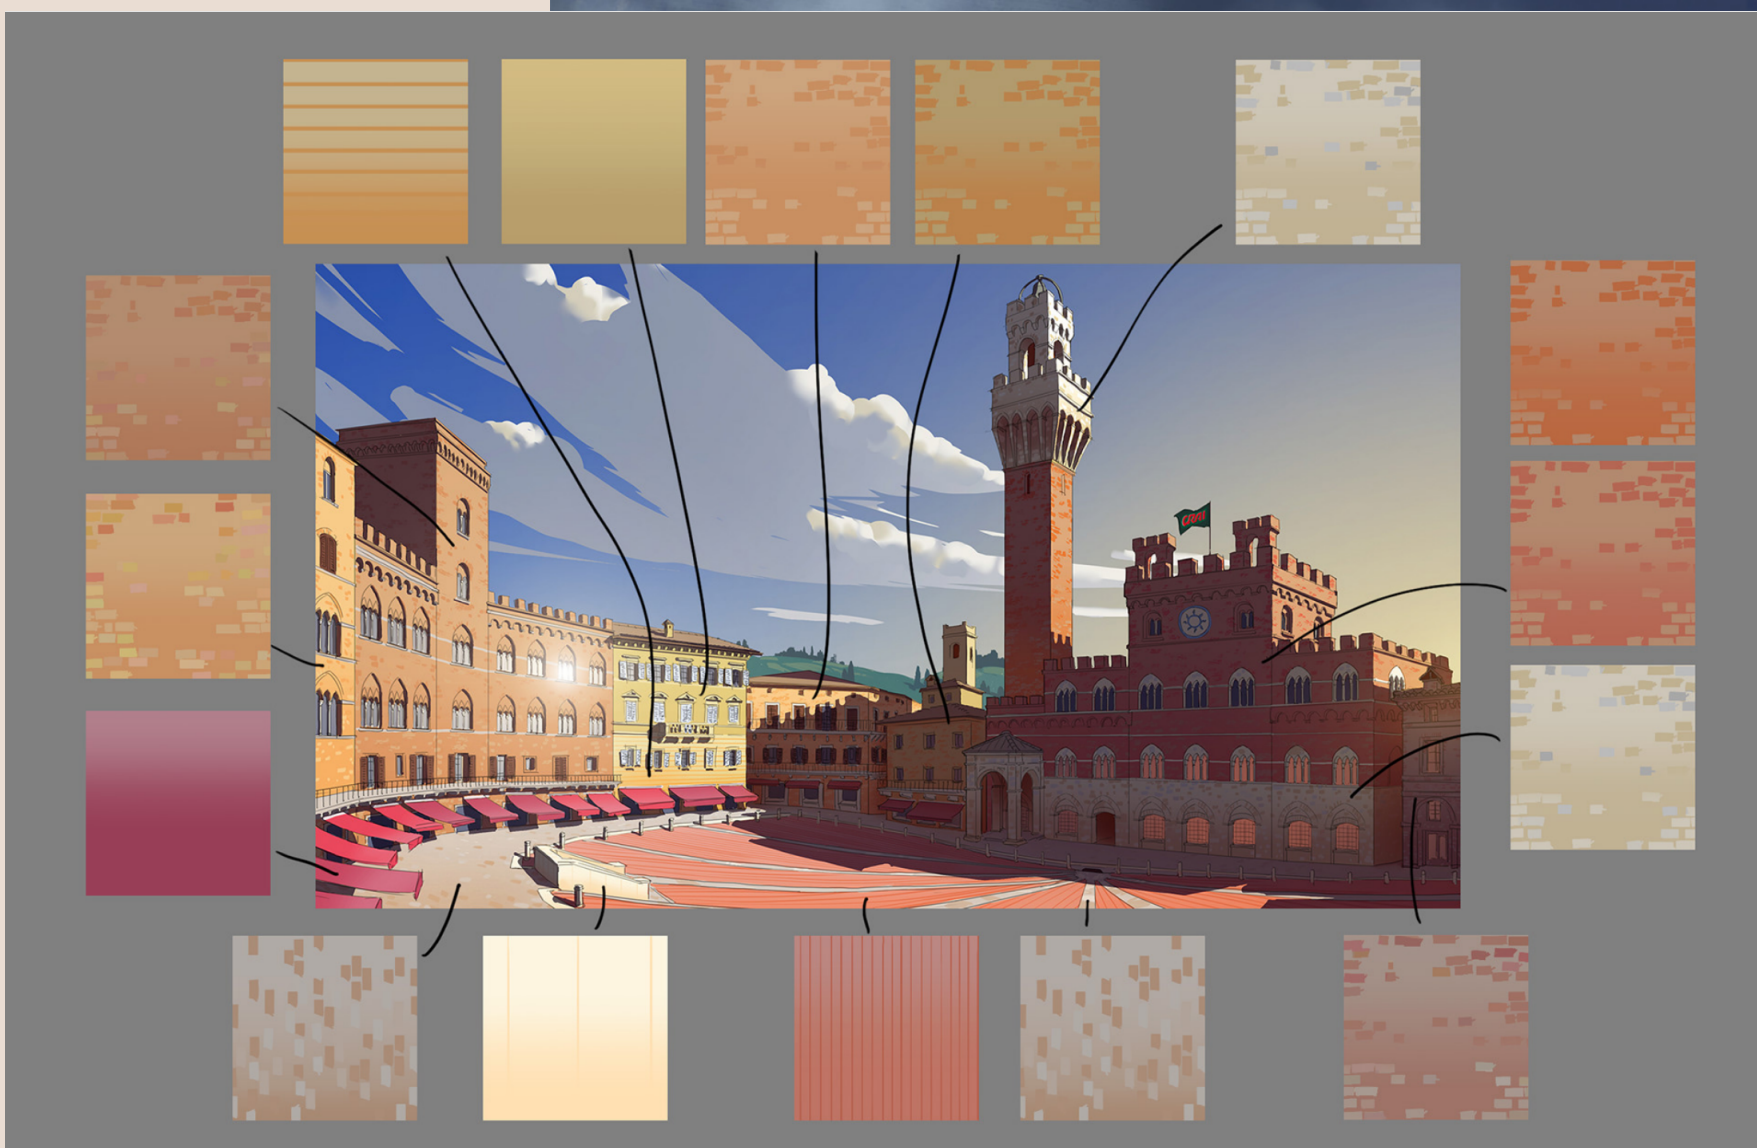

As CGI commercials are a peculiar kind of production, a huge part of the studio efforts goes in designing environments and characters that we have to realize and animate later in 3d.

That's way we have a huge team of top level Concept Designers and Characters Designer, that we choose to call any time, depending on the unique style of each project.
