

JACOPO POZZI

Gaffer & Electric Department

PERSONAL PROFILE

My name is Jacopo Pozzi and I have a simple ambition: tell the beauty of the world through the eyes of a video camera or in a simple frame. Over the years I have also become passionate about the technical part of my work. As a self-taught person, I learned the fundamentals of photography and artificial light control, specializing in the field of cinema electricity and machinery. Today I have only one certainty: I am neither the best nor the most talented at what I do but I am always ready to learn and to give my best in my work and in my passion.
