Factory January 2024

Subject:

Application as Stylist-Collection Coordinator, Pattern Maker.

I have known and worked in the textile sector for many years, since 1990 obtaining the High School Diploma (5 years) as a Fashion Designer (score 50/60) at the GBSidoli Institute (RE)

While attending school I had the opportunity to start working (summer period) at knitwear factories in Reggio. Immediately after graduating I began to gain my first experiences as a stylist - sample coordinator, pattern maker at the Carpi ready-to-wear group. Brand names.

So I have been working in the fashion industry for many years...

Over time I have integrated my stylistic creativity with an increasingly technical, merchandise approach, combining the idea of the current mood with commercial and corporate requests. I have also gained good experience in the modeling/tailoring field by interfacing every time with the pattern office for defect removal, the seamstresses, the purchasing office and the various company departments of the sample collection.

In 1997 I started working as a freelancer at the same time to try my hand at other businesses in the textile, knitwear, men's and children's sectors. Since 2000 I have purchased CAD and have trained more technically also with the use of PC/CAD for models and size developments (Investronica-Lectra). Nowadays I have acquired greater skills in the modeling/tailoring field and I can better define the fashion collections.

I believe I have a good hand for the execution of drawings, sketches and flat drawings for technical data sheets as well as the compilation of the latter itself.

In my experience I have always interacted with stylistic offices and suppliers to coordinate and create various moods and model packages, also researching and testing prints or embroidery tests.

I would like to find a more stable position also with VAT number, or part-time during the sampling phases, during references and to make my ideas and acquired skills available.

Hoping for a positive response, I am available for interviews and any tests.

Kind regards

Barbara Foroni
