SUMMARY

I am completing my II year Master Degree in Computer Science and Engineering at UniBo (University of Bologna). I previously took a bachelor's degree in Information Science for Management. In recent years I have had several working experiences including an internship focused on Disaster Recovery at Bitways in Faenza and I worked in the warehouse at SiComputer in Lugo. In addition, I occasionally work in the film industry. Both my school and work experiences helped me to acquire various skills such as time management, team working, problem solving, entrepreneurship and creativity.
