Droneria Emiliana was born in 2015 when Massimo Tabai (drone Pilot and tech enthusiast) met Alessandro Vezzani (DOP and Cameraman).

When we started there was no Ready to Fly drones, you had to build your own drone and this is how our first drone came to life. The "Morbidrone" has been our first ENAC registered drone followed by two Inspire1 RAW, an Inspire 2 with X7 Camera, a Mavic 2 Pro and finally a Mavic 3 CINE.

Since the beginning safety has been our priority and we always operate in full respects of the Drone Law of our country.

We have authorization to Operate in European Standard Scenario and we are able to obtain special permission from ENAC to fly in Forbidden and Regulated Areas. We Are part of Bee Communications.
