

PODUCER BIOGRAPHY

Lodovico Lombardi born in Forlimpopoli in 1992 after several work experiences in 2018 he resurfaces to one of his greatest passions: photography.

After several working experiences as a photographer and drone pilot in events like "Mille Miglia", "Jova Beach Party", Ravenna Fest and various corporate commercials, corporate events. Thanks to the collaboration with Italdron Air-service worked like drone Pilot for the Netflix TV series "Summertime", after that experience falls in love with the film set and the work done in the camera department.

At the end of 2020 he met Gianfranco Boattini and Lorenzo Callegari, all three of them with a common idea to produce cinematographic products. The first product with which they approach this world is the realization of a short film in collaboration with CNA Cinema Forlì named "Io Caterina" projected at a CNA event at the theater Diego Fabbri in Forlì.

Subsequently, they produce corporate videos and videoclips always focusing on the film world.

In 2021 the first satisfactions arrive producing and collaborating in the production of products like "Il Moro" by Daphne di Cinto "La Sorpresa l'incredibile storia di Padre Marella" by Otello Cenci.

The camera department used to enter the film world has soon had to live with the figure of the producer having produced the first products only with the personal company and then having to deal with the dynamics of production organization and budget management.

In October 2021 OndaFilm of Lombardi Lodovico leaves space to OndaFilm S.r.l a company formed by 5 elements Lodovico Lombardi (CEO), Lorenzo Callegari, Patrizio Orlandi and Andrea Petrini that.

With the birth of the company, the camera department is more and more distant from everyday life leaving more and more space to the production not only for business needs but because it is the environment where Lodovico's skills and potentialities are best exploited.
