PROFILE

Although I specialize in the music sector, I have had several experiences in the multimedia field that allow me to have a 360 ° view on the management of a project.

In particular, I dealt with:

SOCIAL MEDIA MANAGER

I managed the social networks of various realities in the area and beyond, such as: 6sense (instagram page), Baia Imperiale disco, "Daiandiamo" company and Movida Caffè.

VIDEOMAKER

I was involved in the production of several music videos for emerging artists. Just as I was called to shoot promotional videos for clubs and businesses.

I did an internship at the local television "Icaro TV" thanks to which I dealt with some important projects such as the European direct of the European footvolley championship.

GRAPHICS

Also from the graphic point of view I had some work experience, specifically I was involved in creating promotional posters for various clubs in the area.

I have been working with music for several years now, I have my own private studio where I produce, recently one of my songs was selected for the current edition of the Zecchino D'oro, having specialized in music for children.

I held courses for various classes, both private and for third parties, for example I was called as an expert for a course held at the "Giulio Cesare" high school in Rimini.

In 2019 two of my songs were selected in the Fabio Volo TV series "Untraditional 2", broadcast on Sky and on LA9.

Currently, in addition to productions, I also teach music in elementary schools.
