SKILLS AND WORK ATTITUDE

Throughout my professional career, carried out over the years in various fields mostly as a freelancer, I have developed a strong aptitude for flexibility, problem-solving, and a proactive approach, along with the ability to adapt to different contexts both independently and as part of a team, as well as in interactions with external stakeholders.

In recent years, I have gained experience as a driver for transporting people and materials and as an assistant and laborer on various film sets for commercials, TV series, and movies. I have good manual skills (carpentry, assembly/disassembly, driving and maneuvering, loading and unloading), and due to my education, I have a solid knowledge of technical drawing.

RECENT WORK EXPERIENCE
