SOFT SKILLS

- Creativity, passion for photography
- Organizational and planning skills
- Flexibility and ability to adapt
- Excellent resistance to stress
- Strong determination and entrepreneurial spirit
- Team work abilities
- Analytical thinking, problem solving skills and attention to detail

DIGITAL SKILLS

- Excel, Power Point avanzati
- SAP, PLM e IMEL
- Davinci Resolve, Adobe Lightroom e Photoshop
- Social Media
- Blender, Pix4D

LANGUAGES

- Italian (mother tongue)
- English B2

DRONES FLEET

- DJI: Air 2S, Mini 2
- FPV: various drones for video shooting and inspections

I'm a video-maker and an experienced FPV drone pilot with STS-01/02 license (ex critical scenarios). I have a degree in process engineering (Chemistry and Biochemistry).

I started my career working as Specification Administrator (Quality Engineering) at Philip Morris Intl for about 2 years. Following my true passion, in 2022 I left P.M.I. and founded Drone Optical Service, which produces photo and video services, specializing in drone videos.

I have a diversified fleet of drones, a Canon EOS R6 Full Frame video camera with various lenses, a 360° video camera, a number of action cameras, tripods and lights. I personally edit my videos with Davinci Resolve Studio, Adobe Lightroom and Photoshop.

I can work in highly performing, local or international contexts. I developed organizational, teamwork and problem solving skills. I learn constantly with passion and curiosity to always be technically up to date.

I am available to collaborate as an external supplier for production houses and communication agencies that want to carry out challenging projects.

Portfolio: see some of it following the links in the box

Education:

2020 – Università di Bologna UniBo

Degree in process engineering (Chemistry and Biochemistry)
